

First Friends Animal Safari Set

Sorting, counting and matching with animals, rangers and fences. Supports classification by habitat, size and diet, early mathematics and role play.

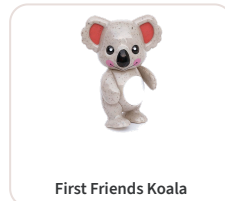

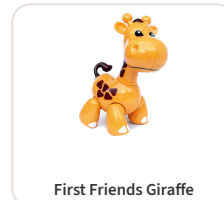

CONTENTS

15 animals, quad, 2 figures, fences, troughs, hay bales

MARKET

Dual — Home & Education

WHAT IS IN THE SET

WHAT CHILDREN LEARN

Classification

Sort by an obvious rule, a given rule, then one the child invents.

Early maths

Count the herd and the legs; share the hay fairly.

Understanding the world

Hot and cold places. Which animals could meet, and which never would?

Language

Names, sounds, stripes, spots, trunk, pouch and tail.

Care & responsibility

Rangers feed, water and fence. Animals depend on their carers.

Social play

One ranger each and a job to share: who fixes the fence?

ONE SET, FIVE YEARS OF PLAY

TRY THIS ON DAY ONE

Who Says That?

12–30 months · Make an animal sound. Can the child find the animal? Then swap.

Feed the Animals

18 months – 3 years · Drive the quad round the park with a hay bale. Stop at each animal and feed it.

Sort the Park

2–4 years · Put the animals in pens by a rule: size, legs, colour, stripes. Then change the rule.
