Sledge Set
20.5 × 14 × 16.5 cm

First Friends Polar Boy

First Friends Polar Girl

First Friends Husky

First Friends Polar Bear

First Friends Seal

First Friends Penguin

WHAT CHILDREN LEARN

Understanding the world

A place where it is always cold: what lives there, what people wear, how they travel and where they sleep.

Problem solving

Five magnetic pieces make one igloo — but only in the right order. The first construction puzzle.

Sorting & matching

Swims or walks, feathers or fur, big or small. Animals that share a home but not a shape.

Language

Cold, ice, snow, slippery, dark. Polar words and animal names in a story a child can move.

Water play

The whale floats and squirts. The polar set is the First Friends set that goes in the water tray.

Social play

Who rides the sledge? Who feeds the husky? Roles to share and turns to take.

ONE SET, FIVE YEARS OF PLAY

TRY THIS ON DAY ONE

Float and Squirt

12–30 months · The whale in the water tray. Float it, push it under, squeeze it and watch it squirt.

Build the Igloo

2–4 years · Five magnetic pieces, one round house. Find the pieces that fit.

Swims or Walks?

2–4 years · Sort the polar animals: which ones swim, which ones walk — and which do both?
