

Rattles Set

Cause and effect through grasping, shaking and passing from hand to hand. Supports fine motor skills, sound discrimination and open-ended sensory exploration.

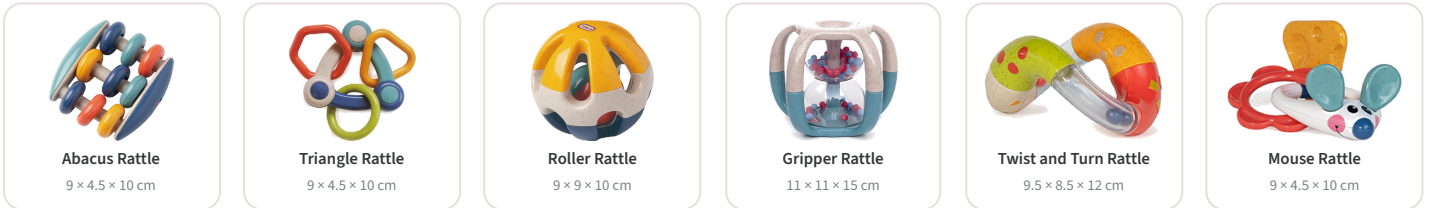

CONTENTS

6 rattles

Dual — Home & Education

WHAT IS IN THE SET

WHAT CHILDREN LEARN

Fine motor

Grasp, hold, pass hand to hand. Sliding abacus beads and turning the mouse's tail refine the pincer grip.

Cause & effect

Shake and it sounds; stop and it stops. The child learns that the noise is theirs to make.

Language

Loud and quiet, fast and slow, more and again — the words arrive with the action.

Sensory discovery

Beads that cascade, rings that spin, a ball that rolls away. Six textures, six sounds, six colours.

Early maths

Beads slide one at a time. Counting starts as a rhythm long before it becomes a number.

Social skills

Rolling the Roller Rattle to a friend and waiting for it back is the first turn a baby takes.

ONE SET, FIVE YEARS OF PLAY

TRY THIS ON DAY ONE

Reach and Hold

3-8 months · Hold one rattle just out of reach, shake it once, wait. Praise any reach.

Shake, Stop, Shake

6-18 months · Shake together, stop together. Say "stop" — and wait for the child to stop too.

Roll It Back

8 months - 2 years · Roll the Roller Rattle across the floor to a friend and wait for it to come back.
