Teatime Shape Sorter

Item number 76008

A teapot that is also a shape sorter. Four mini teacups each fit one opening in the pot, colour-matched to their hole; the lid lifts off so the cups come out again. A clear beaker sits inside the pot, so the same toy pours water for a tea party in the bath or the water tray. One toy, two ways to play — sorting first, pretend play as the child grows.

Clear beaker inside — fill and pour

Four cups, four colour-matched holes

Bath and water-tray play

KEY FEATURES

-  **Sorter and teapot in one**
Post the cups, then lift the lid, take them out and play tea party.
-  **Colour-matched cups**
Each cup fits one hole and shares its colour — two clues for the child to work with.
-  **Real pouring**
The clear beaker holds water; the spout pours. Cold water only, supervised.
-  **Easy-lift lid**
Quick access to the cups — no help needed to start again.

LEARNING & DEVELOPMENT

-  **Shape recognition**
Turning a cup until it fits: the first matching puzzle, with a satisfying drop.
-  **Colour recognition**
"Show me the cup that matches." Colour as a second clue, then on its own.
-  **Fine motor skills**
Gripping, turning, posting, lifting the lid, pouring — hand and wrist together.
-  **Imaginative play**
From sorting to serving: a tea party with real water once the puzzle is mastered.
