Magic Shaker

Item number 76026

A large, colourful rattle with two chambers. Babies from six months grasp the handle and shake it to hear the sound, then turn it upside down to watch the coloured beads flow from one chamber into the other, appearing to change colour as they pass through. A mirror lets babies look at their own reflection. Simple to hold, it rewards every shake and turn with sound and movement.

KEY FEATURES

-  **Flowing beads**
Turn it over and the beads pour from one chamber to the other.
-  **Colour change**
Beads appear to change colour as they move between chambers.
-  **Easy grip handle**
Shaped for grasping and holding by small hands.
-  **Mirror**
Babies can look at their own reflection while they play.

LEARNING & DEVELOPMENT

-  **Sensory exploration**
Rattling sound, flowing beads and a mirror give babies sound, movement and reflection to explore.
-  **Cause and effect**
Shaking makes a sound; turning it over makes the beads flow and change colour.
-  **Fine motor skills**
Grasping the handle and shaking builds grip strength and arm control.
-  **Colour recognition**
Adults can point out the beads changing colour as they pass between chambers.
