Woodland Pop Up

Item number 76032

A woodland-themed pop-up with four different ways to make the characters appear. Toddlers from twelve months turn the flower, push the button and work the other mechanisms to pop up each character, then push them down again to repeat. The forest creatures, such as the hedgehog and caterpillar, give adults plenty to name and talk about, while matching colours between characters and bases supports colour recognition.

KEY FEATURES

-  **Four mechanisms**
Four different actions, including turning and pushing, pop the characters up.
-  **Woodland characters**
Forest creatures and plants to name and talk about.
-  **Push down to reset**
Characters push back into their bases ready to pop up again.
-  **Colour matching**
Colours of characters and bases give matching prompts.

LEARNING & DEVELOPMENT

-  **Cause and effect**
Each turn or push produces a character popping up, a clear action and result.
-  **Colour recognition**
Adults can ask which colour egg the caterpillar is in, or match colours across the toy.
-  **Language development**
Naming the woodland characters and the actions builds early vocabulary.
-  **Fine motor skills**
Turning, pushing and pressing the different mechanisms practise hand control.
