First Friends Fire Engine

Item number 76086

A chunky, free-wheeling fire engine with a First Friends firefighter at the wheel. The figure lifts out and clicks into the open seat at the back, so the child loads, drives and rescues in one continuous play. Big wheels roll easily on any floor; the squeaking, posable firefighter and the fire engine's own job give a young child plenty to talk about.

Firefighter figure included

Seat in the back for any First Friend

Free-wheeling — pushes and rolls

KEY FEATURES

Free-wheeling

Large, smooth wheels roll on carpet and hard floors alike.

Figure fits in the back

Every First Friends character fits the seat — one system, many combinations.

Firefighter included

Clicking head, arms and legs, a squeaking tummy and a hat that turns.

Built for small hands

One-piece body, no small parts, no batteries. Safe for teething.

LEARNING & DEVELOPMENT

Imaginative play

A vehicle with a job: someone needs help, and the firefighter goes.

Language development

What does a fire engine do? Why do we need firefighters? Colours, wheels, sounds.

Movement & gross motor

Push, chase and crawl after it — from the first sitting months to running play.

Fine motor skills

Seating the figure, turning the hat, clicking the limbs into a pose.
